

Intermediate/Senior Aquatic Ecologist-Biologist

VAST Resource Solutions is a diverse and growing natural resource consulting company based in Cranbrook, BC and providing services to private and public sector clients throughout western Canada. We are seeking an experienced, field-ready **Intermediate/Senior Aquatic Ecologist-Biologist** to join our team. This is a permanent full-time position to begin as soon as the ideal candidate is found.

The Aquatic Ecologist-Biologist will lead a broad range of fish and aquatic habitat assessment, aquatic ecology, benthic invertebrate, field inventory/survey, stream classification, water quality monitoring, and construction environmental monitoring projects. Experience operating in a dynamic consulting environment that requires flexibility and teamwork is a definite asset.

Responsibilities:

- Design, perform and manage a diverse range of aquatic biota and habitat studies, including the collection, analysis and interpretation of biological, chemical, physical, and statistical data.
- Conduct fish, aquatic, and benthic sampling using a variety of field gear, analytical equipment, and sampling techniques in a range of aquatic environments.
- Coordinate, supervise and mentor environmental technicians.
- Prepare detailed technical reports for clients, regulatory agencies and other stakeholders.
- Provide technical assistance in the preparation of environmental compliance and regulatory documents required for project approval and implementation, such as Environmental Assessments, EMPs, environmental protection plans, permits, licenses, and approvals.
- Manage all aspects of project implementation, including resourcing, budgeting, scheduling, reporting, quality management, and day-to-day client liaison.
- Develop and manage effective relationships with industry, government, First Nations, clients, and the communities where we work and live.
- Apply novel solutions to problems and challenges to meet client and regulatory requirements.
- Prepare work plans and cost estimates for technical programs, and write high quality proposals.
- Contribute to the continued growth and scientific development of VAST Resource Solutions.

Requirements:

- An MSc in aquatic ecology/biology or a related discipline, plus five or more years of relevant experience, OR a BSc in a related discipline, plus seven or more years of relevant experience; previous consulting experience would be a definite asset.
- Professional registration as an RPBio, PBIOL, or BIT, or eligible for registration within six months of employment commencement.
- Demonstrated ability to proficiently complete the identified job responsibilities.
- Knowledge of federal and provincial legislation relating to the aquatic environment and experience liaising with regulators, First Nations, and other key stakeholders.
- Previous experience leading or participating in BC Environmental Assessment Office (BC EAO) and/or Canadian Environmental Assessment Agency (CEAA) project applications would be an asset.
- Up-to-date First Aid, Swiftwater Rescue Technician (SRT 1), Electrofishing, Small Vessel Operator Proficiency (SVOP) certification, and a current Driver's License.

Intermediate/Senior Aquatic Ecologist-Biologist

Closing date: Tuesday, October 9, 2018
